

NAVDEEP SINGH BIST

Aspiring Associate Product Manager

Haldwani, Uttarakhand | navdeepsinghbisht135@gmail.com | 8273677376 | linkedin.com/in/navdeep-singh-bisht-75908a228

PROFESSIONAL SUMMARY

Aspiring Product Manager with 2+ years of experience in content development, structured teaching, and stakeholder coordination for 150+ students at Delhi IAS Academy. Currently pursuing Product Management with Applied AI (MASAI x iHUB DivyaSampark, IIT Roorkee). Built 15+ end-to-end product case studies — from problem discovery and user research to PRDs, pricing strategy, metrics, and go-to-market planning — across marketplaces, AI, SaaS, and commerce. Seeking an APM/PM opportunity to bring structured thinking, analytical rigor, and a user-centric approach to product development.

EDUCATION & CERTIFICATIONS

MASAI iHUB DivyaSampark, IIT Roorkee — Product Management with Applied AI | 2026 – Present

- Hands-on curriculum: product strategy, PRD/PRFAQ writing, GTM strategy, user research, applied AI in products
- Certificate of Excellence in Evaluations — awarded for top performance across program evaluations
- Certificate of Dual Excellence — recognized for consistent high performance across multiple evaluation cycles

Kumaun University — B.Sc. (Physics, Chemistry, Mathematics) — M.B.P.G. College, Haldwani

PROFESSIONAL EXPERIENCE

Delhi IAS Academy — Educator & Program Support | 2023 – Present

- Designed and delivered structured content across Mathematics, Reasoning, Geography, History, and Uttarakhand GK for 150+ students, breaking down complex concepts into clear, actionable learning frameworks.
- Created study materials, assessment frameworks, and progress-tracking systems to improve visibility into student learning milestones and batch performance.
- Coordinated scheduling, communications, and issue resolution across students, faculty, and administration, serving as the primary point of contact for operational concerns.
- Simplified complex problem-solving frameworks for diverse learners — directly translating to structured, user-centric product thinking.

PRODUCT CASE STUDIES (PORTFOLIO)

4 featured, end-to-end projects (PRD + pricing strategy + launch plan), plus 15+ additional assignments completed as part of MASAI x IIT Roorkee coursework.

1. ParkKumaon — Smart Parking Marketplace (Self-Initiated Startup Concept)

- Two-sided parking marketplace for tourist destinations in Kumaon (Nainital, Bhimtal, Haldwani): online discovery, advance booking, and QR-based entry.
- Delivered: Full PRD (acceptance criteria, 10-case edge case matrix, North Star Metric), pricing strategy (dual-fee model with clear rationale), phased launch plan (0–10K users), and 2-page executive summary.
- Built interactive demo using Replit (live: attachment-manager--navdeep18.replit.app).

2. Local Assured Commerce — Hypothetical Amazon Feature

- Explored how Amazon could let Tier 2/3 city customers discover, reserve, and securely pick up electronics from nearby verified retailers.
- Delivered: PRD with Happy Path flow, 10-case edge case matrix (fraud, double-booking, PDI failure), OTP + password-based secure delivery design, and phased launch strategy.

- Designed full low-fi wireframe journey (Discovery → Booking → Payment → PDI → OTP Confirmation → Refund) in Miro.

3. Jio OnePass — Hypothetical Unified Loyalty Program (Reliance Jio)

- Designed a 3-tier loyalty ecosystem (Lite/Plus/Max) unifying JioMart, AJIO, Reliance Digital, JioCinema/JioHotstar, and telecom under a single rewards currency.
- Delivered: PRD with Strategic → Business → Product → CX objectives hierarchy, 4-category dependency breakdown, 10-case edge case matrix (fraud, family-pool conflicts, campaign overlaps), North Star + Guardrail metrics, and phased launch strategy.

4. M-Live — Hypothetical Creator & Live Commerce Feature (Myntra)

- Explored how Myntra could turn live, creator-hosted fashion streams into a direct shopping channel (watch → ask → trust → buy without leaving the stream).
- Designed a tension-aware North Star Metric (“Non-Returned GMV”) explicitly balancing GMV growth against the return-rate-reduction goal — preventing the metric from rewarding impulsive, low-confidence purchases.
- Delivered: PRD with three-sided user stories (Customer/Creator/Brand), acceptance criteria, 10-case edge case matrix, sequenced 3-part monetization model (commission → sponsorship → premium events), and 8-month phased launch plan.

Additional case studies from coursework include: B2B SaaS pricing strategy (DataSift), sprint planning (Notifications module), GTM positioning (NutriFy), PRFAQ vs. PRD evaluation (Nova), GTM strategy (CRED), and feature design (MedAlert). Shared as LinkedIn posts.

SKILLS

PM Frameworks: PRD & PRFAQ Writing, User Story Mapping, Feature Prioritization, Acceptance Criteria, Edge Case Analysis, North Star & Guardrail Metrics, GTM Strategy

Research & Analysis: User Research & Discovery, Competitive Analysis, Pricing Strategy & Benchmarking, Metric Design, Data-Driven Decision Making

Stakeholder & Ops: Stakeholder Management, Cross-functional Coordination, Program Management, Escalation Handling

Tools: Notion, Miro (Wireframing), Figma (Basic), Excel / Google Sheets, Replit, Gamma, Canva, ChatGPT

ACHIEVEMENTS

- Certificate of Excellence in Evaluations — Product Management with Applied AI, iHUB DivyaSampark, IIT Roorkee (in collaboration with Masai), June 2026
- Certificate of Dual Excellence — recognized for consistent high performance across evaluation cycles in the same program, June 2026
- Built and shipped 4 featured, end-to-end product case studies (PRD + pricing strategy + launch plan) and 15+ additional coursework assignments across AI, SaaS, Logistics, Commerce, and FinTech
- Independently built and launched a working demo (ParkKumaon) from problem research to a functional, navigable prototype — without a traditional development background
